I'm using 'Altislife' in this tutorial, because it's mainly used and easy to remember. Samtheman New to FAN'runs Posts: 13 joined: Thu 01 June 2017 8:44 Post by Samtheman A Thu 01, 2017 10:01 pm Hello! I probably suppose that most of you are looking at it not crazy that there will be autoinstaller for Altis's life or anything on the custom Weapon 3 NFO game panel, but not very difficult to set it on a game panel. Also, be sure to move tballloc.dll to the root 3 or your database will be missing dependencies and not load properly. You don't need to grant user µ permission on phpmyadmin, heidi or where you access the database, I would give all the permissions µ since you are not using to connect to the database. You don't mind adding me to Steam, username© Dachurchill2 Samtheman wrote: à Thu 01 June, 2017 10:01 - Hosted MySQL Server (this can be purchased with an NFO plan too ©m!) Samtheman wrote: à Thu 01 June 2017 10:01 - Hosted MySQL Server (this can be purchased with an NFO plan too ©m!) You do not need to have a MySQL database for your server. islife.sql - (keep this link in mind) - Navicat / Heidisql - (Heidi A© recommended) - Notepad ++ - V7.4.1.html - FileZilla Client - Hosted MySQL Server hosted (this can be purchased with an NFO plan too ©m!) To come, once you have not successfully installed Navicat / Heidi and your MySQL server or set one on your Web Hoster, login is required details about Navicat / Heidisql. * You cannot check the server logs in File Manager. // miss cycle µ jusee below) Miss class {Mission1 class {Model = "Gaming.altis"; "Gaming.altis"; .uarged .roiretna apate a arap PTF etnelic o arap uotsarra %Àcov euq ofÀssim ed ovuqtra ues od atsap aus ad emon o res eved 'stla.gnimaG' ; } ;
